McDonald claims to have had a source inside the Mexico City USSR embassy, which I regarded and regad as utterly false (re Oswald there and the Odum 1 pix). What brings this to mind is p.24 of the Stern 2/17/64 memo on presidential security. There is clear indication the source there cited was an inside Embassy source. This indicates that the source was CIA and it told the FBI, which merely cited a confidential informant. What makes this interesting is that whether or not this was later known, and I do not recall that it was, McDonald clearly has not even read the Report, so how he'd know it I can't imagine unless he, too, had a confidential informant. There have by now been several indications of this sorth, that he had someone feeding him that upon which he embellished and personalized. HW 7/7/75
